1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Applicant's submission filed on 7/21/2005 has been entered.

The following is a statement of reasons for the indication of allowable subject matter. The prior art fails to teach the method of Claim 2 which specifically comprises the following features in combination with other limitations:

c) for each block in turn, determining a current target block size, the current target block size for said first block being said baseline target block size, **the current target block size for said intermediate block and said last block being equal to the said current baseline target block size plus an accumulating savings associated with the preceding block in said series;**

d) for each block in turn, **selecting a compression mode based on the number of colors in said block**, said compression mode to compress that block so that **the resulting compressed block fits its corresponding target block size as determined in step c;** and

e) for each block in turn, compressing the block using the compression mode selected in step d to yield a corresponding compressed block.

The prior art fails to teach the system of Claim 11 which specifically comprises the following features in combination with other limitations:

--a mode selector coupled to said encoder for **selecting one of said compression modes for compressing a given source block based on the number of colors in said given source**

block, said mode selector *selecting a compression mode at least in part as a function of a target block size for a current source block*;

-- an evaluator for **determining the target block size for each of said source blocks**.
